

To whom it may concern,

Jordisk Consulting has been engaged to provide consulting/advisory services to Stable Resourcing Limited to support the calculation of Stable Resourcing Limited \$\frac{1}{3}\$ 2019, 2023 and 2024 total company greenhouse gas emissions.

Stable Resourcing Limited has only partial activity and spend data available from the 2019 period.

The Scope 1 and scope 2 reporting is based on previous emissions reporting to Microsoft. No records of gas or electricity consumption are now available from this period.

For scope 3, Jordisk Consulting has reviewed the company purchase/spend records for the main categories of: Software Subscriptions, Vehicle hire, repairs & license, Staff training, Telephone & Internet services. Emissions were calculated using UK GHG emission factors. No records are available to enable calculation of other scope 3 emissions.

The emissions were calculated using Greenhouse Gas Protocol criteria and are shown in the table(s) below. For 2024 year reporting the additional Scope 3 categories have been added to the table for completeness and consistency.
